Claims 1-7, 9, 10 and 12-14 are allowed.

The examiner agrees that Shibata shows the upper insulating layer #214 as being confined to a central region of the upper surface, that the lower dielectric layer #214, is the substrate, and therefore extends in a square shape over the whole bottom portion. The examiner does not agree with applicant's arguments regarding the interoperability of Shibata. The examiner also disagrees with applicant's interpretation of the thick this ratio is taught by Shibata. However, such disagreements are moot in view of the above noted structural differences that render the claims allowable.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Budd whose telephone number is 571-272-2019. The examiner can normally be reached on Monday-Thursday from 6 a.m. to 4 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schubert, can be reached on 571-272-2044. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
